Entdecken, Staunen und Begreifen – mit Kindern vergeht die Zeit wie im Flug, doch für die Freigeister wird jeder einzelne Tag zu einem spannenden Abenteuer.

Discovering, marvelling and understanding - time flies with children, but for the free spirits, every single day is an exciting adventure.

Découvrir, s'étonner et comprendre - avec les enfants, le temps passe vite, mais pour les esprits libres, chaque jour se transforme en une aventure passionnante.

POSTER
POSTER
POSTER

Kurzanleitung – Poster aufhängen

1. Vorbereitung: Um ein Poster aufzuhängen muss sichergestellt sein, dass alle dafür notwendigen Materialien vorhanden sind. Benötigt wird eine Befestigungsmöglichkeit (z. Bsp. Doppelseitiges Klebeband oder ein spezieller Posterhalter), eine Wasserwaage (optional, aber hilfreich für ein gerades Ergebnis), ein Bleistift und natürlich das Poster. Zudem sollte sichergestellt sein, dass keine alten Nägel, Haken oder ähnliches in der Wand stecken, um eine ebene Oberfläche zu gewährleisten. Für ein optimales Ergebnis ist darauf zu achten, dass die Wand sauber und trocken ist.

2. Finden der richtigen Position: Vorab sollte das Poster an die Wand angehalten und ggf. verschiedene Positionen ausgetestet werden, um die beste Platzierung zu finden.

3. Markieren der Position: Sobald die optimale Position gefunden wurde, sollte die Stelle leicht mit einem Bleistift oder einem Stück Klebeband an der Ober- und Unterseite des Posters, sowie auf der Wand, markiert werden.

4. Poster aufhängen und ausrichten: Das Poster mit der gewählten Befestigungsmöglichkeit (Klebeband, Posterhalter...) an der Wand anbringen – hierbei sind den Anweisungen des jeweiligen Herstellers Folge zu leisten für ein optimales Erlebnis. Stellen Sie zudem nochmals sicher, dass es fest und gerade hängt. Sollte das Poster noch nicht gerade hängen (dies kann mit einer Wasserwaage überprüft werden), sollte die Position nochmals korrigiert werden.

Bewundern des Ergebnisses: Einen Schritt zurücktreten und das Poster bewundern, das nun perfekt an der Wand hängt.

Quick reference guide – Instructions for hanging posters

1. preparation: To hang up a poster, you must ensure that all the necessary materials are available. You will need a mounting option (e.g. double-sided adhesive tape or a special poster holder), a spirit level (optional, but helpful for a straight result), a pencil and, of course, the poster. You should also make sure that there are no old nails, hooks or similar stuck in the wall to ensure a flat surface. For optimum results, make sure that the wall is clean and dry.

2. finding the right position: The poster should be held against the wall in advance and, if necessary, different positions tested to find the best placement.

3. marking the position: As soon as the optimum position has been found, the spot should be position should be marked lightly with a pencil or a piece of adhesive tape on the top and bottom of the poster and on the wall.

4. hang and align the poster: Attach the poster to the wall using the chosen mounting option (adhesive tape, poster holder...) - follow the respective manufacturer's instructions for an optimal experience. Also make sure once again that it is hanging firmly and straight. If the poster is still not hanging straight (this can be checked with a spirit level), the position should be corrected again.

Admire the result: Take a step back and admire the poster, which is now hanging perfectly on the wall.

Guide rapide – Instructions pour accrocher un poster :

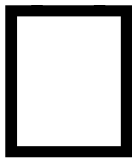

1. préparation : pour accrocher un poster, il faut s'assurer que tout le matériel nécessaire est disponible. Il faut une possibilité de fixation (par exemple du ruban adhésif double face ou un support spécial pour poster), un niveau à bulle (facultatif, mais utile pour obtenir un résultat bien droit), un crayon et bien sûr le poster. En outre, il faut s'assurer qu'il n'y a pas de vieux clous, crochets ou autres dans le mur afin de garantir une surface plane. Pour un résultat optimal, il faut s'assurer que le mur est propre et sec.

2. trouver la bonne position : au préalable, il convient d'arrêter le poster contre le mur et, le cas échéant, de tester différentes positions afin de trouver le meilleur emplacement.

3. marquage de la position : une fois que la position optimale a été trouvée, il convient de marquer l'emplacement. Marquer légèrement l'emplacement avec un crayon ou un morceau de ruban adhésif sur le dessus et le dessous du poster, ainsi que sur le mur.

4. accrocher et aligner le poster : Fixer le poster au mur à l'aide de la méthode de fixation choisie (ruban adhésif, support de poster...) - il convient ici de suivre les instructions du fabricant concerné pour une expérience optimale. Assurez-vous encore une fois qu'il est bien accroché et droit. Si le poster n'est pas encore bien droit (ce qui peut être vérifié à l'aide d'un niveau à bulle), il convient de corriger à nouveau sa position.

Admirer le résultat : prendre un peu de recul et admirer le poster qui est maintenant parfaitement accroché au mur.

KEILRAHMEN
CANVAS FRAME
CADRE À CLAVETTE

Kurzanleitung – Keilrahmen

Anleitung Keilrahmen mit Holzkeilen spannen

Die Keilrahmenbilder von Komar können jederzeit nachgespannt werden. Die Bespannung aus Vliesmaterial kann mithilfe von Holzkeilen gestrafft werden. Das Wandbild erhält dadurch ein glatteres Erscheinungsbild.

Und so geht's: Auf der Bildrückseite befindet sich ein separater Beutel mit acht Holzkeilen. Für jede Ecke werden zwei Spannkeile benötigt. Lege dein Bild mit der Vorderseite nach unten auf eine saubere Fläche. Nun schiebst Du jeweils zwei Spannkeile in eine Ecke. Die Keile sollten parallel zu den Holzleisten liegen. Mit einem Hammer kannst Du noch mehr Spannung erzeugen, indem Du die Keile zusätzlich in die Ecken hineinklopfst.

Instructions for using canvas keys to stretch a canvas frame

The canvas prints from Komar can be re-stretched at any time. The cover made of non-woven material can be tightened with the help of wooden wedges (canvas keys). This gives the print a smoother appearance.

Here's how: On the rear of the picture, you will find a bag containing eight canvas keys. Two keys are needed for each corner. Place your picture face down on a clean surface. Now push two keys into each corner. The keys should be parallel to the wooden slats. You can use a hammer to create even more tension by tapping the keys into the corners.

Instructions pour tendre un châssis avec des cales en bois

Les tableaux sur châssis de Komar peuvent être retendus à tout moment. La toile en non-tissé peut être tendue à l'aide de cales en bois. Cela donne un aspect plus lisse au tableau mural.

Voici comment ça fonctionne : Vous trouverez au dos du tableau un sachet à part contenant huit cales en bois. Deux cales de serrage sont nécessaires pour chaque coin. Posez votre tableau à l'envers sur une surface propre. Glissez maintenant deux cales de serrage dans chaque coin. Les cales doivent être parallèles aux baguettes en bois. Avec un marteau, vous pouvez augmenter la tension en tapant sur les cales pour les enfoncer dans les coins.

**FOTOTAPETEN VLIES
PHOTOMURALS NON WOVEN
PAPIERS PEINTS
PANORAMIQUES INTISSÉ**

Komar Digitaldruck Fototapeten – gut für Daheim, gut für die Umwelt

Um ein Durchscheinen des Untergrundes zu vermeiden, muss dieser eine homogene Färbung aufweisen, sauber und glatt sein.

1. Legen Sie die Tapete vor dem Verkleben aus und kontrollieren Sie diese, da wir für Klebekosten nicht haften können.
2. Um die Position der ersten Bahn zu markieren, zeichnen Sie mittels Wasserwaage und Lot Hilfslinien mit Bleistift an die Wand.
- 3/4. Die Tapete kann in Wandklebetechnik angebracht werden; hierzu den Kleister mit einer Rolle oder einer Bürste bahnenweise auf die Wand gleichmäßig auftragen. Mit einem sauberen Tuch, weichen Roller oder Bürste die Tapete andrücken; von oben nach unten und von innen nach außen arbeiten. Das Trocknen muss langsam erfolgen, um ein Klaffen an den Verbindungslinien und ein Rissigwerden der Tapete zu vermeiden.
5. Die Bahnen der Vliestapeten werden Stoss an Stoss verklebt. Verwenden Sie dafür handelsüblichen Kleister für Vliestapeten. Arbeiten Sie daher bei einer Zimmertemperatur von ca. 18-20°C, vermeiden Sie Luftzug (Fenster geschlossen halten, im Winter mäßig heizen).
6. Abschließend Überstände mit einem Cutter vorsichtig abschneiden. Kleisterreste auf der Tapete sofort mit einem feuchten Schwamm oder Tuch abtupfen.

Komar Digital Printed Wallpaper – good for the home, good for the environment

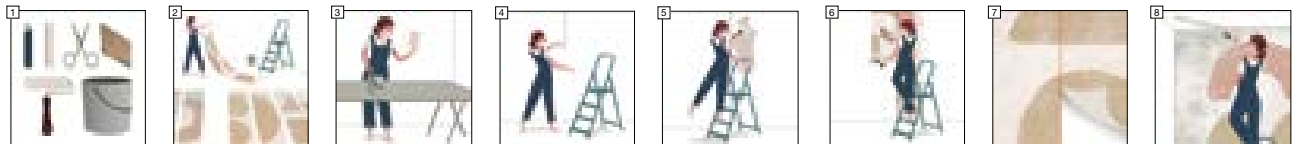

All surfaces must be of homogeneous colour, be clean, smooth and free from dust.

1. Lay out and check the wallpaper for any defects before applying, as we cannot offer compensation once the wallpaper has been applied.
2. To mark the position of the first panel, draw guide lines on the wall with a pencil using a level and plumb line.
- 3/4. The wallpaper can be applied using the wall pasting technique: to do this, apply the paste evenly tot he wall one panel at a time using a roller or brush. Press the wallpaper with a clean cloth, soft roller or brush; work from top to bottom and from the inside tot he outside. Drying must be done slowly to avoid gaping at the joint lines and cracking of the wallpaper.
5. The panels are applied edge to edge. Use commercially available paste for non-woven wallpaper. Work at a room temperature of about 18 – 20°C, avoid drafts (keep windows closed, moderate heating in winter).
6. Finally, carefully cut off any excess with a cutter. Remove paste residues on the wallpaper immediately with a damp sponge or cloth.

Les papiers peints panoramiques Komar en impression numérique – superbes pour votre intérieur et bons pour l'environnement

Pour éviter que le support ne transparaisse, il doit présenter une coloration homogène, être propre et lisse.

1. Étaler et vérifier le panoramique avant tout travail, la pose vaut l'acceptation du produit.
2. Pour positionner le 1^{er} lé, tracer au crayon une ligne horizontale et verticale à l'aide d'un niveau et d'un fil à plomb.
- 3/4. La pose du papier peint panoramique se fait par encollage du mur. Pour cela, étaler la colle uniformément sur le mur – de la largeur d'un lé – à l'aide d'un rouleau ou d'une brosse. Maroufler avec un chiffon propre, une brosse ou un rouleau doux; partir du haut vers le bas et de l'intérieur vers l'extérieur. Le séchage doit être réalisé lentement, car un séchage trop rapide pourrait provoquer un écartement aux joints et la matière du panoramique risquerait de devenir cassante.
5. Poser les lés du panoramique intissé bord à bord. Utiliser pour cela une colle usuelle spécialement pour intissé. Merci de veiller à ce que la température soit ambiante à environ 18-20°C, éviter les courants d'air (garder les fenêtres fermées, chauffer modérément en hiver).
6. Pour terminer, couper délicatement les surplus avec un cutter. Eliminer de suite en tamponnant les excédents de colle sur les lés à l'aide d'un chiffon ou d'une éponge propre et légèrement humide.
